

## **Solidarity with the International Communist Current**

Recently an unprincipled and adventurous group with initial “IGCL” has attacked the International Communist Current with dirty methods. These smear campaigns only benefits the political police. Internationalists, regardless of their convergence or divergence in the political positions must reject such actions and stress that they have zero tolerance for such acts. We would like to express our solidarity to the comrades of the ICC and in defence of the proletarian values and principles; we will address the issue in more detail in near future.
