

Solidarity with the Internationalist Communist Tendency

Once again another important Communist Left organization has become the target of smear and discredit. Once again the most determined militants of the Communist Left accused of links with forces of the bourgeois state. Once again the values and principles of the Communist Left was dragged through the mud.

The glorious and proud history of the Internationalist Communist Tendency will not be unclean with such smear campaigns. Internationalist Communist Tendency historically and organically rooted in the currents that have defended of the communist positions during the blackest period of contra-revolution. More than 80 years this current defended Communist Left positions.

These smear and discredit campaigns only benefits the political police. Communist Left does not only mean defending of some political position but also means defence of the proletarian values and principles.

Internationalists, regardless of their convergence or divergence in the political positions must reject such actions and stress that they have zero tolerance for such acts. We would like to express our solidarity to the comrades of the ICT. Best wishes to the comrades of the ICT for their battle in the class struggle for the Communist Revolution.
